***Allowable Subject Matter***

1. Claims 1-40 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, Lyerly et al (US 6,795,034 B2) discloses a reflector system comprising a first reflector configured to transmit a first frequency; a second reflector configured to reflect a second frequency band; and a primary reflector configured to receive the first and second frequency bands reflected from the first and second reflectors. Lyerly, however, fails to specifically teach a configuration wherein the first reflector is configured to transmit a first portion of the first frequency band in a dispersed beam, to reflect a second portion of the first frequency band, and to transmit a second frequency band; a second reflector configured to reflect the second frequency band transmitted by the first reflector and to transmit the first portion of the first frequency band; and the primary reflector configured to reflect the second portion of the first frequency band and the second frequency band in a substantially collimated beam.

Claims 2-17 are allowed for depending on claim 1.

Regarding claim 18, Donn (US 6,252,559 B1) discloses a multiband reflector configured to transmit a first frequency and a second frequency band. Donn, however, fails to specifically teach that the reflector is configured to transmit the first frequency band in both a first collimated beam and in a dispersed beam and to transmit the second frequency band in a second collimated beam.

Claims 19-40 are allowed for depending on claim 18.

Art Unit: 2821

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

*Conclusion*

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Patent 5,373,302 discloses a multi-band reflector antenna system.
